Synthetic data engines for multimodal AI. I build end-to-end systems (data flywheels, model training, reward modeling) for foundation models.

## Research

|                                                                                                                                                                   |      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>SAM 3D</b><br>CVPR 2026 Best Paper Honorable Mention. Data flywheel for visually grounded 3D. Led post-training and layout. 2B flow matching model; 6T tokens. | 2026 |
| <b>Locate3D</b><br>Data flywheel for 3D language grounding. ICML Spotlight (top 3%); featured by Meta CEO.                                                        | 2025 |
| <b>Fast3R</b><br>CVPR 2025. Reconstruct 1000+ images in one forward pass; 350+ citations, 1.5k GitHub stars.                                                      | 2025 |
| <b>OpenEQA</b><br>CVPR 2024. Embodied question answering benchmark across 180+ real-world scenes.                                                                 | 2024 |

## Selected Publications

|                                                               |                            |
|---------------------------------------------------------------|----------------------------|
| Taskonomy: Disentangling Task Transfer Learning               | CVPR Best Paper, 2018      |
| OmniData: A Scalable Pipeline for Multi-Task Mid-Level Vision | ICCV, 2021                 |
| Robust Learning Through Cross-Task Consistency                | CVPR Best Paper Nom., 2020 |
| Mid-Level Visual Representations Improve Generalization       | CoRL, 2019                 |
| Gibson Env: Real-World Perception for Embodied Agents         | CVPR Spotlight, 2018       |

## Experience

|                                                                                                                                                                     |                                         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| <b>Anthropic</b> , San Francisco, CA<br>Pretraining research.                                                                                                       | Member of Technical Staff, 2026–present |
| <b>Meta (MSL / FAIR)</b> , Menlo Park, CA<br>Synthetic data and post-training for multimodal generative models. Tech lead for SAM 3D; core contributor to Locate3D. | Senior Research Scientist, 2023–2026    |
| <b>Meta (FAIR)</b> , San Francisco, CA<br>Scalable multi-view 3D reconstruction with Georgia Gkioxari.                                                              | Research Intern, 2022–2023              |
| <b>UC Berkeley</b> , Berkeley, CA<br>Transfer learning and pretrained representations for embodied AI. Advisors: Jitendra Malik, Amir Zamir.                        | Ph.D. Candidate, 2018–2023              |

## Education

|                                                                                                                          |      |
|--------------------------------------------------------------------------------------------------------------------------|------|
| <b>Ph.D. Computer Science, UC Berkeley</b><br>Advisors: Jitendra Malik, Amir Zamir<br>Minor: High-Dimensional Statistics | 2023 |
| <b>M.S. Computer Science, Stanford</b><br>Advisor: Silvio Savarese                                                       | 2018 |
| <b>B.S. Mathematics, Stanford</b>                                                                                        | 2018 |

## Awards

---

|                                                |           |
|------------------------------------------------|-----------|
| Best Paper Honorable Mention, CVPR             | 2026      |
| Outstanding Reviewer, CVPR                     | 2026      |
| Outstanding Reviewer, ICLR                     | 2024      |
| Outstanding Reviewer, CVPR                     | 2022      |
| NVIDIA Graduate Fellowship (Honorable Mention) | 2021–2022 |
| Best Paper Award Nomination, CVPR              | 2020      |
| CVPR Habitat Challenge Winner [RGB Track]      | 2019      |
| Best Paper Award, CVPR                         | 2018      |
| NVIDIA Pioneering Research Award               | 2018      |
| Stanford Distinction in Research               | 2018      |

## Mentorship

---

|                                                    |           |
|----------------------------------------------------|-----------|
| Mentored 5 interns → 4 publications (CVPR, 3×ICML) | 2024–2025 |
| BAIR Mentoring Program, UC Berkeley                | 2019–2023 |

## Invited Talks

---

|                                                                    |      |
|--------------------------------------------------------------------|------|
| Post-Training for Physical World AI, UC Berkeley                   | 2025 |
| SAM 3D Reddit AMA                                                  | 2025 |
| Sensory Ecology Seminar (Poster), Lund University, Sweden          | 2022 |
| Mid-Level Visual Representations, CS 280 (guest lecture), Berkeley | 2021 |

## Teaching

---

|                                                                    |      |
|--------------------------------------------------------------------|------|
| Machine Learning (TA): <i>Berkeley CS 189/289A</i>                 | 2020 |
| Representation Learning (Head TA): <i>Stanford CS 331B</i>         | 2018 |
| Mathematical Foundations of Computing (TA): <i>Stanford CS 103</i> | 2015 |

## Service

---

|                                                                     |              |
|---------------------------------------------------------------------|--------------|
| <b>Reviewer:</b> NeurIPS, ICML, ICLR, CVPR, ECCV, ICCV, CoRL, TPAMI | 2018–present |
| <b>Graduate Admissions:</b> Berkeley, EPFL                          | 2019, 2021   |
